

What Is C|TIA

Certified Threat Intelligence Analyst (C|TIA) is a brand-new threat intelligence training program that is designed and developed in collaboration with cybersecurity and threat intelligence experts across the globe to help organizations identify and mitigate various business risks by converting unknown internal and external threats into known threats. It is a comprehensive specialist-level program that teaches a structured approach for building effective threat intelligence.

C|TIA is a method-driven course which gives a holistic approach covering vast concepts concerning organizational threat intelligence that are highly essential while building an effective threat intelligence that can secure organizations from future threats or attacks.

Course Content

This program addresses all the stages involved in Threat Intelligence Life Cycle, and this attention towards the realistic and futuristic approach makes C|TIA one of the most comprehensive threat intelligence certifications on the market today. This program provides solid professional knowledge that is required for a career in threat intelligence, and it enhances your skills as a Threat Intelligence Analyst, increasing your employability.

Who Is it For?

This program is designed for cybersecurity professionals, especially ethical hackers, security practitioners/engineers/analysts/specialist/architects/managers, threat intelligence analysts/associates/researchers/consultants, threat hunters, SOC professionals, digital forensic and malware analysts, and incident response team members. As well as any mid-level to high-level cybersecurity professionals with a minimum of 3-5 years of experience. Individuals from the information security profession and who want to enrich their skills and knowledge in the field of cyber threat intelligence and individuals interested in preventing cyber threats can also benefit from this program.

Why Become a C|TIA

- Built in Compliance with the NICE and CREST Framework
- Helps Increase Employability
