

What Is CASE .NET?

CASE professionals take software development up a notch by introducing security requirements across all stages of the software development life cycle (SDLC), as well as, secure coding practices, secure requirement gathering, robust application design, and handling security issues in both pre and post development phases of application development.

The hands-on training program is one of the most comprehensive certifications for secure software development in the market today. It's desired by software application engineers, analysts, testers globally, and respected by hiring authorities.

Course Material

All attendees will receive their personal copy of the CASE courseware, an EC-Council CASE exam voucher, and access to iLabs (EC-Council's cloud driven labs environment)

Who Is It For?

- .NET Developers with a minimum of 2 years of experience and individuals who want to become application security engineers/analysts/testers.
- Individuals involved in the role of developing, testing, managing, or protecting .NET based applications.

Top Critical Features of C|ASE

- **Security Beyond Secure Coding** - Challenging the traditional mindset where secure application means secure coding
- **Testing and credentialing** secure app development across SDLC
- **The most comprehensive training program** for application developers covering techniques such as Input Validation techniques, Defense Coding Practices, Authentications and Authorizations, Cryptographic Attacks, Error Handling techniques, Session Management techniques, among many others
- **An exhaustive range of Labs** available for EC-Council's application security training program
- CASE Program maps to many Specialty Areas under "Securely Provision category" in the **NICE 2.0 Framework**

Why Become a Certified Application Security Engineer

- **Immediate Credibility:** The CASE program affirms that you are indeed an expert in application security. It also demonstrates the skills that you possess for employers globally.
- **Pertinent Knowledge:** Through the CASE certification and training program, you will be able to expand your application security knowledge.
- **Multifaceted Skills:** CASE can be applied to a wide variety of platforms, such as, mobile applications, web applications, IoT devices, and many more.
- **A Holistic Outlook:** Ranging from pre-deployment to post-deployment security techniques, covering every aspect of secure – software development life cycle, CASE arms you with the necessary skills to build a secure application.
- **Better Protect and Defend:** By making an application more secure you are also helping defend both organizations and individuals globally. As a CASE, it is in your hands to protect and defend and ultimately help build a safer world.

Exam Information:

- Number of Questions: 50
- Test Duration: 2 Hours
- Test Format: Multiple Choice Questions
- Passing Score: 70%
- Availability: EC-Council Exam Portal
