

What is ECIH?

ECIH has been designed and developed in collaboration with cybersecurity and incident handling/response experts across the globe. It is a comprehensive specialist level program, with C|EH and C|ND being the “Core” certifications, that teaches how organizations can effectively handle post breach consequences by reducing the impact of the incident, both financial and reputational.

The course is built after the rigorous Job Task Analysis (JTA) of the job roles involved in the field of incident handling and response. It is a highly interactive, comprehensive, standards-based, intensive 3-days training program that teaches a structured and professional approach for effective incident handling in real-life.

Course Content

E|CIH is a method-driven program which gives a holistic approach covering vast concepts concerning organizational incident handling and response from preparing/planning the incident handling response process to recovering organizational assets from the impact of security incidents. These concepts are highly essential for handling and responding the security incidents to secure the organizations from future threats or attacks.

Who Is it For?
